SUMMARY

Final-year B.Tech Information Technology student, with project experience in Python, Machine Learning, and FastAPI. Seeking a Data Scientist role to turn data into real-world impact.

TECHNICAL SKILLS

Languages: Python, C, C++

Data Science & ML: NumPy, Pandas, Scikit-learn, NLP

Web & Backend: FastAPI, REST API, HTML, CSS, JavaScript, React.js

Databases: MySQL, MongoDB

Tools & Platforms: VS Code, Git, GitHub, Postman, Jupyter Notebook

Core Concepts: Data Structures & Algorithms, OOP, Machine Learning, Artificial Intelligence

PROJECTS

AI Resume Skill Gap Analyzer

[GitHub](#)

- **Tech Stack:** Python, FastAPI, Scikit-learn, NLP, REST API, React.js
- Developed an AI-powered full-stack resume analysis platform as a 4-member team using React.js, FastAPI, and Python that extracts skills from resumes, compares them against industry job-role requirements, and identifies skill gaps.
- Implemented an adaptive recommendation engine with custom skill taxonomy and learning dataset to generate personalised career improvement pathways and learning suggestions for users.

Digital Decision System

[GitHub](#)

- **Tech Stack:** Python, FastAPI, HTML, JavaScript
- Built a multi-criteria decision support web app using Python, FastAPI, HTML, and JavaScript that scores and ranks options using a composite weighted formula across cost, growth, risk, time, and stability.
- Engineered an AI recommendation engine that auto-generates context-aware insights — detecting dominant leaders, risk flags, growth signals, and competitive gaps — improving decision accuracy by up to 25%.

Binance Trading Bot

[GitHub](#)

- **Tech Stack:** Python, Binance Futures API, REST API
- Built a terminal-based Python trading bot integrated with Binance Futures API, supporting real-time live price ticker, multi-symbol price board, and automated order execution.
- Implemented 4 order types - Market, Limit, OCO (Take Profit + Stop Loss), and TWAP (Time-Weighted Average Price) with a modular src architecture separating each order logic into dedicated modules.

EXPERIENCE

Salesforce Programming Architect Intern — TechForce Academy, Australia [\[Certificate\]](#) Jun 2025 – Aug 2025

- Completed a 2-month internship at TechForce Academy in Salesforce Programming Architecture, gaining hands-on experience with CRM development, data modelling, automation workflows, and enterprise system configuration.

EDUCATION

Bachelors of Technology - Information Technology

2023 – 2027 (Expected)

Arya College of Engineering & IT, affiliated to Rajasthan Technical University, Jaipur

CGPA: 8.3 / 10

Senior Secondary— Munnilal Singh High School, Bihar

2022 – 2023 | 62%

Secondary— Rose Public School, Bihar

2020 – 2021 | 69%

CERTIFICATIONS

- Oracle Certified Foundations Associate – Oracle (March, 2025)
- Artificial Intelligence – HP Life | HP Foundation (August, 2025)
- Python Programming – Reliance Foundation (March, 2025)
- MongoDB – MongoDB University (September, 2025)

EXTRACURRICULAR ACTIVITIES

- Art Park Code Forge Hackathon by IISc Bangalore – Developed an AI-based solution as part of a 4-member team.
